Dear Doctor,

My name is Anish Mirchandani, DO and I would like to introduce myself as a new Pain Management physician in the Portland, OR community. I have recently joined Willamette Pain & Spine, conveniently located in West Linn and Clackamas. I am accepting new referrals and I can help provide your patients with the latest pain interventional injections, medication optimization, and a comprehensive treatment plan. At WPSC our staff will promptly schedule patient appointments along with minimal wait times for the initial evaluation. I am in-network with all major insurance plans and I am accepting Medicare.

I am fellowship trained in Interventional Pain Medicine, with residency training in Physical Medicine and Rehabilitation. I completed residency training at Columbia and Cornell University in New York, followed by an ACGME accredited Pain Medicine fellowship at the University of Texas in San Antonio. I use interventional procedures and a multidisciplinary approach to treat pain by integrating physical modalities, neuromodulation, medications, and psychological support. I individualize treatment plans with a primary focus to help restore patient function and improve quality of life.

As the newest member of Willamette Pain & Spine Center, I am committed to ensuring WPSC provides the best evidence based, patient centered, and comprehensive care plan. In the midst of a national opioid epidemic, WPSC takes a firm stance on ensuring safe and responsible prescribing habits. As a practice we strive to provide the community with access to quality care, which includes optimizing all non-opioid alternatives.

I would love to have the opportunity to evaluate your patients and provide a chronic pain treatment program. The following is a sample list of conditions included in my scope of practice.

Cervical, Thoracic, Lumbar Pain (i.e. axial and radicular pain syndromes, residual post-laminectomy pain syndromes)
Muscle Pain (i.e. Fibromyalgia, Trigger Points)
Joint Pain (i.e. Osteoarthritis, Rheumatoid Arthritis.)
Tendon Pain (i.e. tendonitis, tendinopathies, calcific tendonitis)
Headaches (i.e. Chronic Migraine Headaches, cervicogenic headaches, occipital neuralgias)
Neuropathic Pain Syndromes (i.e. inguinal neuralgias, Trigeminal Neuralgia, Post Herpetic Neuralgia)
Peripheral Neuropathies (i.e. Carpal Tunnel Syndrome, Painful Diabetic Neuropathy)
Cancer Pain (i.e. cancer treatment related pain)

I would love to meet with you in person to discuss how I can help your patients and coordinate excellent patient care with you. Please feel free to contact me, I would be happy to answer any questions you may have and/or discuss a patient case you may be considering.

Sincerely,

A handwritten signature in dark ink, appearing to read "Anish", written in a cursive style.

Anish Mirchandani, DO
