To Doctors from Emergency Departments, Specialist offices, (including, dentists, podiatrists, others), Urgent Care, Surgeons of ALL types:

If you advise one of our patients to use analgesic medicines over and above the medicines and dose WPSC providers have previously arranged. We (WPSC) expect you to write for the prescriptions covering the advice which you have given. Anything different is poor medical care. We cannot be expected to carry out a treatment program for a patients' condition which we did not evaluate; also we cannot be expected to write prescriptions for medicines we did not select after our own evaluation.

Please understand that our practice ONLY sees patients for chronic conditions. Our appointment availability is generally 4 weeks or longer. If you advise a patient to have treatment (medicines, etc.) after your care, please write appropriate prescriptions.

Patient with chronic pain conditions often have acute pains arise for unrelated situations. Despite treatment for the patient chronic pain condition, they do experience acute pain. In these situations, a patient's regular medicine program is usually inadequate to address the acute symptoms. Please treat our patients compassionately as you would any other patient with acute pain. At WPSC we do not have the resources to manage and treat acute medical conditions.

You have our sincere thanks.

The Providers at WPSC
